

Contents

Towards research-based science teacher education (Intentions of the symposium) <i>Ingo Eilks & Bernd Ralle</i>	1
Research-oriented learning in teacher education <i>Johannes Wildt</i>	5
Strategies for research-based science teachers education: An appraisal of their effectiveness <i>John K. Gilbert & Vesna Ferk Savec</i>	17
Freshman science student teachers' beliefs on science teaching – A mixed methods study <i>Silvija Markic, Nicos Valanides, & Ingo Eilks</i>	29
Argumentation in initial teacher training: Empowering prospective chemistry teachers with evidence and justification <i>Sibel Erduran</i>	41
Trainee teachers' reflection – A process study from preparation to a metacognitive experience <i>Pernilla Nilsson</i>	53
Understanding and valuing the development of pedagogical content knowledge in science teacher education <i>John Loughran, Amanda Berry, Pam Mulhall, & Jim Woolnough</i>	65
Putting research into practice: What student teachers have to offer <i>Judith Benett, Martin Braund, Bob Campbell, & Nick McGuinn</i>	77
Prospective primary school teachers' argumentation skills: Using a text-based online conference <i>Nicos Valanides</i>	89
The development of in-service science teachers' practical knowledge of teaching models and modelling in the context of educational innovation <i>Jan H. van Driel & Ineke Henze</i>	99

Accomplished practice of chemistry teachers through an evidence-based continuous professional development <i>Rachel Mamlok-Naaman, Dorit Taitelbaum, Miriam Carmeli, & Avi Hofstein</i>	113
The learning teacher <i>Erik Joling</i>	125
Using socially derived teaching approaches in science classes – a longitudinal study on teachers learning in a research based curriculum innovation <i>Miia Rannikmae</i>	137
Lab experiments as a tool of an everyday assessment <i>David-S. di Fuccia & Bernd Ralle</i>	147
Empowerment of teachers for designing context-based chemistry education: towards a framework for teacher professional development <i>Machiel Stolk, Onno de Jong, Astrid M. W. Bulte, & Albert Pilot</i>	159
Supporting learning processes – Professional development and in-service training of physics teachers <i>Hans E. Fischer, Georg Trendel, Thomas Reyer, Rainer Wackermann</i>	171
Ways towards for research-based science teacher education (Reflections from the symposium) <i>Ingo Eilks, Bernd Ralle, Silvija Markić, Albert Pilot, & Nicos Valanides</i>	179
List of participants	185
